
JETRO Philippine IT Industry Update Report for Japanese Readers

Since August 2004, SpiceWorx has been working hand in hand with

JETRO (Japan External Trade Organization) in publishing periodic reports on Philippines' IT and IT enabled services industry targeting Japanese readers to raise awareness among them about Philippines as an offshore outsourcing destination. Reports are available from JETRO websites in Japanese and English.

In June 2008, case studies of offshore software developments by Japanese companies in the Philippines that were featured in the past reports (August 2004 to March 2008) were separately compiled and published by JETRO.
